

The Graduate Program of the Center for the Study of Rationality

General:

- Each student enrolled in the program must complete 15 credit hours of coursework over and above his or her departmental requirements. Thus, in particular, the student may not count any course both towards his or her departmental requirements and simultaneously towards the course requirement of the Center.
- The 15 credits must be accrued from courses offered in the Center's program of study. In exceptional cases (and only with prior approval of the head of the graduate program) the student may be allowed to include courses that are offered outside the program.
- No more than one course taken without a numerical grade may count towards the required credits. (The student's transcript will list the grade for such a course as "active participation.")

The Structure of the Program:

- The Graduate Program has two required courses:
 - **Games and The Economics of Information (Microeconomics B')**
 - This course is required of students registered in the following departments: *mathematics, computer science, economics, business administration, and statistics*. Students registered in other departments may register for this course. Alternatively, they may register for **Game Theory: Introduction and Applications**.
 - **Topics in Rationality**
- In addition each student must complete:
 - **One course with experimental content**
 - **At least one course on decision making**

Time Limits, Reporting, and the Annual Retreat:

- Time limits:
 - MA students must complete the required 15 credits within two years of their initial registration in the program.
 - Doctoral Students must complete the required 15 credits within three years of their initial registration in the program.
- Reporting
 - At the beginning of each academic year (and no later than **November 1**) each student who has not yet completed the required 15 credits must send an e-

mail listing the courses at the Center for which he or she has registered in that academic year. (This requirement applies even to students who register for none of the Center's courses in that academic year.)

- At the end of each academic year (and no later than **October 1**) each student must send an e-mail listing those courses that he or she completed that year. These e-mails should be sent to: rominag@savion.huji.ac.il.
 - The student's end of year report will be sent to his or her advisor, and the advisor will be asked to comment on the student's academic achievements in the past year.
- Annual Retreat:
 - Students registered in the program must attend the Center's annual retreat. Each student must lecture at the retreat at least once.
